In the UPC Tech Transfer Plan 2016-2020, one of the pillars, is to build on an strategy to generate spaces of excellence among its different campus, orientated to the promotion and management of the innovation processes inside the UPC and its community (researchers, students, former alumni, incubated companies, etc.)

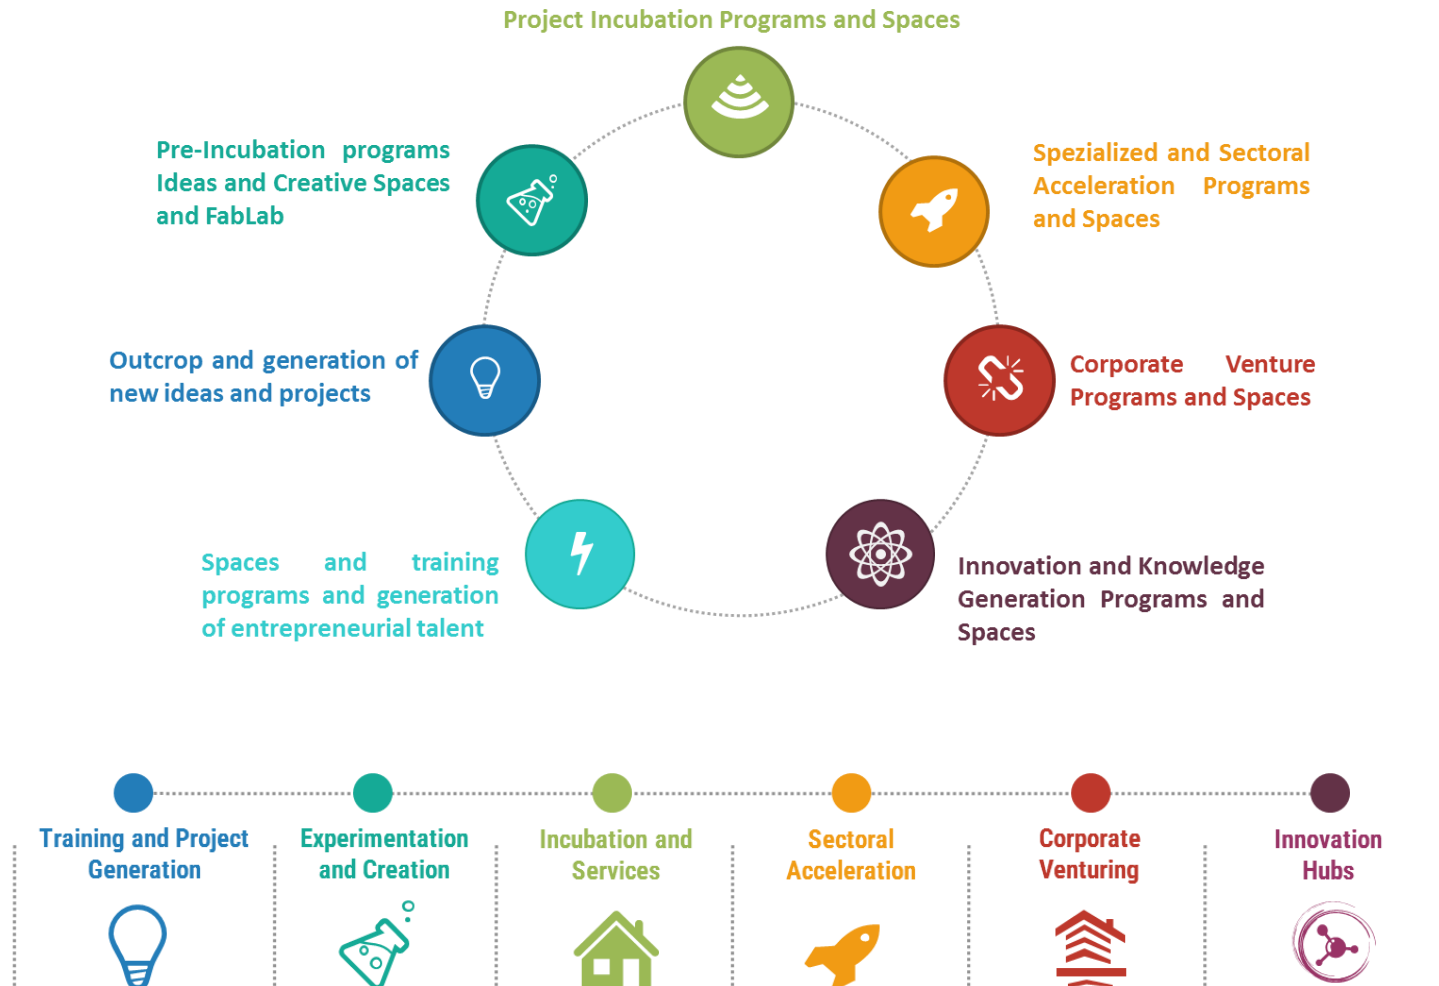

The mission for the UPC Innovation Ecosystems is a better exploitation of the different UPC Innovation resources and an increased capacity for generating innovation, directing it to the territory and companies, with the aim of increasing its competitiveness. Positioning the UPC as a reference partner provider of innovation and tech transfer.

UPC Innovation Ecosystems, coordinates tools and programmes connect in order to conceive:

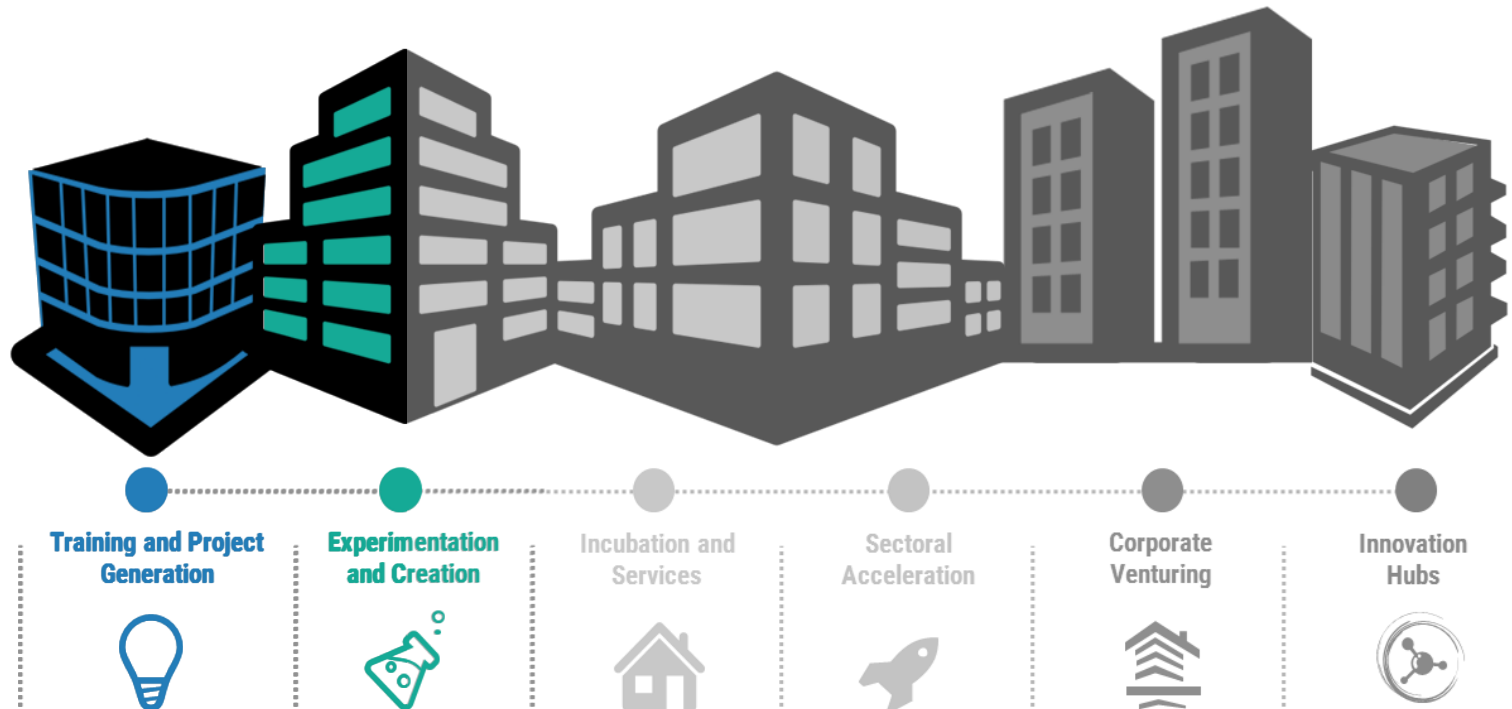

- The **capacitation of talent** in the innovation and entrepreneurship fields.
- **Generation**, growth and maturation of **innovation projects**.
- Preparation and filtering of technologically based projects and the **generation of corporate acceleration programmes and technological scouting**.
- The **generation of opened innovation spaces** (public-private) through the innovation Hubs and the different programmes they could generate.
