Who we are

History

Fondazione Politecnico di Milano **was established in 2003** by Politecnico di Milano, several major companies and important local authorities.

Fondazione has a strong commitment in fostering the **innovation and development of the regional and national economic system**.

This is brought forth strengthening the relationship between Politecnico, business sector, institutions and Public authorities, through smooth partnership processes, both at international and national level.

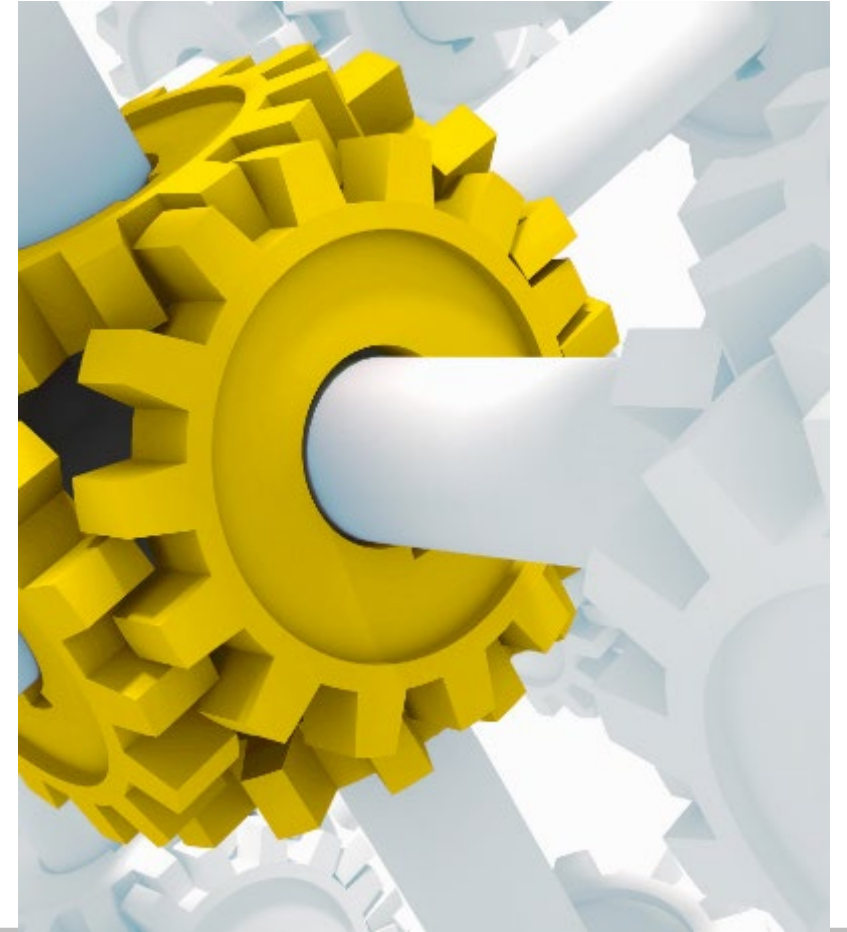

Moreover, high professional support is provided in research, training and deployment of innovative learning solutions and Politecnico third mission.

Mission

The mission is accomplished by:

- managing, at national and international level and in synergy or on behalf of Politecnico, **joint ventures and stakes in Companies and Institutions**, whose activities are compliant with the Foundation's mission and are also essential to accomplish Politecnico mission;
- managing highly qualified professional units able to **support the development, management and capitalisation of research and training and third mission activities**, both at national and international level, in synergy with University's strategic and organizational development policies;
- ensuring a transversal approach on all the activities, above all the ones at international level, on **ethics, sustainability and social responsibility**;
- supporting the creation and growth of **innovative hi-tech companies and SMEs**.
